Retake the assignment in 7h 57m

1.	What is polymorphism?	1 / 1 point
	When two things share properties in common.	
	When the definition of a class changes over time.	
	When multiple objects have distinct methods.	
	When one thing can have multiple forms.	
	Correct Correct!	
2.	Which of the following statements is true?	1 / 1 point
	O Inheritance and overriding are required for polymorphism.	
	Inheritance and overriding enable polymorphism.	
	Overriding is necessary for inheritance.	
	Inheritance is necessary for overriding.	
	Correct!	

3.	If a type satisfies an interface, which of the following statements is true?	1 / 1 point
	The type defines all <b>methods</b> specified in the interface.	
	The type defines all <b>data</b> specified in the interface.	
	The type defines a <b>method</b> specified in the interface.	
	The interface includes a definition of the type.	
	Correct!	
4.	Which of the following statements is true?	1 / 1 point
	A concrete type is always a dynamic <b>type</b> .	
	O An interface always has a dynamic <b>value</b> .	
	An interface always has a dynamic type.	
	An interface type is the same as a dynamic type.	
	Correct!	
5.	Which of the following statements is/are true?	1 / 1 point
	I. Interfaces can support abstraction by concealing differences between types.	
	II. Type assertions can reveal differences between type satisfying an interface.	
	iii. Type assertions return two values.	
	◯ I and II but NOT III.	
	◯ II and III but NOT I.	
	○ I and III but NOT II.	
	I, II, and II	
	<b>⊘</b> Correct	

Correct!

6.	What is a use for an empty interface?	1 / 1 point
	O It allows two interfaces to be merged into one.	
	It allows a function to accept a variable number of arguments.	
	It can be used to allow a function to accept any type as a parameter.	
	An empty interface cannot exist in Go.	
	<b>⊘</b> Correct	
7.	After executing the expression below, what is the value of <b>err</b> if there is no error?	1 / 1 point
	f, err := os.Open("/harris/test.txt")	
	o nil	
	O 0	
	Correct!
